Review of Operations

The modaraba's performance in the past financial year remained exceedingly satisfactory i.e. achieved profitability of Rs. 14.053 million. Nonetheless, the modaraba deemed it expedient to make a provisioning of Rs. 12.50 million for a court case instituted against Quetta Textile Mills Limited. Although the said case is still subjudice in the Banking Court, yet the modaraba exercised prudence and strictly acted in accordance with the prudential regulations for modarabas hence, the profitability dropped to Rs. 3.028 million for the year ended June 30, 2017.

Financial and Economic Review

The continuing factors that are generally constraining the Pakistan's economy to achieve sustainable recovery and growth includes:

- the asymmetrical inflation and saving rates.
- continuing fiscal slippages.
- unresolved power sector issue.
- high level of government borrowings
- Political and operational inconsistency
- New and stringent taxation measures
- falling international and domestic commodity pricing.

Future Outlook of the Modaraba

The modaraba would continue concentrating more on Ijarah, Diminishing Musharika and trading activities, as these have yielded beneficial results. However, the modaraba is hopeful that the business climate may improve in the short to medium term, whereafter a new business strategy may be devised.

الكريم وعلى اله واصحابه اجمعين- اما بعد

میں نے انور مضاربہ مینجمنٹ (پرائیوٹ) لمیٹڈ کے زیر انتظام چلنے والی فرسٹ انور مضاربہ کا جون ۲۰۱۷ء کو ختم ہونے والے سال کا شریعہ کپلائنس اور شریعہ آڈٹ مکینیزم کے تحت جائزہ لیا۔ میرے اس جائزے کے مطابق میری رائے ہے:

شرعی تعمیل

مضاربہ نے ایسا طریقہ اختیار کیا ہے جو شریعت کی روح اور مزاج کے مطابق ہے۔ اختیار کردہ نظام، طریقہ کار اور قواعد تمام کے تمام شرعی قواعد کے مطابق ہیں۔

نئی ادائیگیاں

اثاثہ جات کے کھاتے میں، مضاربہ کمپنی نے اپنے گاہکوں کو اجارہ، شرکت متناقصہ (سٹریکیٹ) وغیرہ کی بنیادوں پر ادائیگیاں کیں۔ میں اس کی توثیق کرتا ہوں کہ مضاربہ کمپنی کے اختیار کردہ یہ معاہدے شریعت کے مطابق ہیں اور یہ معاہدے شرعی بورڈ کے منظور کردہ ترتیب کے مطابق ہیں اور تمام متعلقہ شرائط کی تعمیل کی گئی ہے۔

ڈیویڈنڈ میں غیر شرعی حصہ کا صدقہ

مضاربہ کمپنی نے ایکویٹی کے ڈیویڈنڈ کے غیر شرعی حصہ کا صدقہ شرعی رہنما اصولوں کے مطابق کیا اور خیرات کے لیے مختص رقم خیراتی فنڈ میں خیراتی مقصد کے لیے جمع کرا دی گئی۔

حکافل

نقصان کے خطرات کو کم کرنے کے لیے مضاربہ کمپنی نے حکافل کمپنیوں سے تحفظ حاصل کیا ہے اور اسی کا تسلسل جاری ہے۔ مضاربہ نے کسی بھی روایتی انشورنس کمپنی کی انشورنس پالیسی حاصل نہیں کی ہے۔

2.8 Critical accounting estimates and judgments

The preparation of financial statements in conformity with approved accounting standards requires the use of certain critical accounting estimates. It also requires management to exercise judgment in application of the Modaraba's accounting policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. These estimates and assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both the current and future periods.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED JUNE 30, 2017

Significant accounting estimates and areas where judgments were made by management in the application of accounting policies are disclosed in note 3 & 41 to these financial statements.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented.

3.1 Cash and cash equivalents

Cash and cash equivalents in the statement of cash flows includes cash in hand, balance with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts / short term borrowings. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

3.2 Financial assets

3.2.1 Classification

The Modaraba classifies its financial assets in accordance with the requirements of International Accounting Standard 39 (IAS 39) Financial Instruments: Recognition and Measurement, except for the assets classified under Islamic Financial Accounting Standards, in the following categories: at fair value through profit or loss, loans and receivables, held to maturity and available for sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition and re-evaluates this classification on a regular basis.

a) At fair value through profit or loss

Financial assets that are acquired principally for the purpose of generating profit from short term fluctuations in prices are classified as 'financial assets at fair value through profit or loss' category. The financial assets classified as at fair value through profit or loss included investments in listed equity securities.

b) Loans and receivables

These are non-derivatives financial assets with fixed or determinable payments that are not quoted in an active market. The financial assets included in loans and receivables classification are cash and bank balances, Musawamah finance, Modaraba finance, net investment in finance lease and advances, deposits, prepayments and other receivables.

c) Held to maturity

These are investments with fixed or determinable payments and fixed maturity with the Modaraba having positive intent and ability to hold to maturity. These are measured at amortized cost.

d) Available for sale financial assets

Financial assets intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in equity prices, are classified as 'available for sale'. Available for sale financial instruments are those non-derivative financial assets that are designated as available for sale or are not classified as (a) loans and receivables (b) held to maturity (c) financial assets at fair value through profit or loss. The financial assets classified as 'available for sale' include investments in listed equity securities.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED JUNE 30, 2017

e) Investment in associates

The Modaraba considers its associate to be such in which the Modaraba have ownership of not less than twenty percent of the voting power and / or has significant influence through common directorship, but not control.

The Modaraba accounts for its investment in associate using the equity method. Under this method investment is initially recognized at cost, being the fair value of consideration given includes acquisition charges associated with such investments. Subsequently the investors' share in profit / loss of the Investee is recognized in profit and loss. Distributions received from the investee reduce the carrying amount of the investment. Adjustment to the carrying amount will also be made for changes in the investor's proportionate interest in the investee arising from changes in the investee's over comprehensive income.

Where Modaraba's share of loss of an associates equal or exceeds its interest in the associates, the Modaraba discontinue to recognize its shares of further losses except to the extent that Modaraba has incurred legal or constructive obligation or made payment on behalf of the associates. If the associates subsequently reports profits, the Company resumes recognizing its share of those profit only after its share of the profit equals the share of losses not recognized.

3.2.2 Initial recognition and measurement

Financial assets are initially recognised at fair value plus transaction costs except for financial assets carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs associated with these financial assets are taken directly to the profit and loss account.

3.2.3 Subsequent measurement

Subsequent to initial recognition, financial assets are valued as follows:

a) "Financial asset at fair value through profit or loss' & 'available for sale'

The investment in listed equity securities are marked to market using the closing market rates and are carried on the balance sheet at fair value.

Gains and losses arising from the difference between the carrying amount and the value determined in accordance with the criteria mentioned above in respect of financial assets at fair value through profit or loss are taken to the income statement.

Net gains and losses arising from the excess of value determined in accordance with the above mentioned criteria over the carrying amount in respect of 'available for sale' financial

assets are recognised in other comprehensive income until the 'available for sale' investment is derecognised. At this time, the cumulative gain or loss previously recognised in other comprehensive income is transferred to the profit and loss account.

The Modaraba accounts for its investment in associated undertakings using the equity method. Under this method Modaraba's share of the post acquisition profits and / or losses of the associate is recognised in the profit and loss accounts and its share of post acquisition movements in reserve is recognised in reserves. Where modaraba's share of losses of an associates equal or exceeds its interest in the associates, the modaraba discontinue to recognize its shares of further losses except to the extent that modaraba has incurred legal or constructive obligation or made payment on behalf of the associates. If the associates subsequently reports profits, the modaraba resumes recognizing its share of those profit only after its share of the profit equals the share of losses not recognised.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED JUNE 30, 2017

b) Loans and receivables' & 'held to maturity

Loans and receivables and held to maturity financial assets are carried at amortized cost.

3.2.4 Regular way contracts

All purchases and sales of securities that require delivery within the time frame established by regulation or market convention such as 'T+2' purchases and sales are recognised at the trade date. Trade date is the date on which the Modaraba commits to purchase or sell the assets.

3.2.5 Impairment

The management assesses at each balance sheet date whether there is objective evidence that the financial asset or a group of financial assets is impaired.

a) Financial assets classified as "held to maturity"

For loans and receivables, a provision for impairment is established when there is objective evidence that the Modaraba will not be able to collect all amounts due.

For financial assets carried at amortized cost, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The asset's carrying amount is reduced and the amount of the loss is recognised in the profit and loss account.

If a loan or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in the profit and loss account.

b) Financial assets classified as 'available for sale'

In case of equity securities classified as 'available for sale', a significant or prolonged decline in the fair value of the security below its cost is considered as an indicator that the securities are impaired. If any such evidence exists for 'available for sale' financial assets, the cumulative loss measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss - is reclassified from equity and recognised in the profit and loss account. Impairment losses recognised on equity instruments are not reversed through profit and loss.

c) Financial assets classified under Islamic Financial Accounting Standards

In case of assets classified under Islamic Financial Accounting Standards, the assets shall be reviewed and provided for according to the time based criteria mentioned in the Prudential Regulations for Modarabas.

3.2.6 Derecognition

Financial assets are derecognised when the rights to receive cash flows from the financial asset have expired or have been transferred and the Modaraba has transferred substantially all the risks and rewards of ownership.

3.3.5 Intangible assets

Intangible assets having a finite useful life are stated at cost less accumulated amortization and accumulated impairment losses, if any. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only where it is probable that the future economic benefits associated with the asset will flow to the Modaraba and the cost of item can be measured reliably. - 19.1** "This includes Sindh sales tax on management company's remuneration payable amounting to Rs.42,705/- (2016: Rs. 1,736) as per the provisions of Sindh Sales Tax on Services Act, 2011. The said Act has been published as an Act of the Legislature of Sindh vide notification dated June 10, 2011. As per the advice obtained from the Tax consultant, the levy is effective from the date of amendment made in the Second Schedule through the Amendment Ordinance dated November 1, 2011. Due to the enforceability of the Act, the payable to the Modaraba Management Company has come under the ambit of the Act."

The levy has been recorded as Sales tax refundable on the basis of opinion received from the tax consultant advising that the excess input tax shall be adjustable against the output tax on other services subject to levy under Sindh Sales Tax on Services Act, 2011 and any excess input tax shall be refundable.

- 19.2** The Finance Act 2008, introduced an amendment to the Worker's Welfare Fund Ordinance, 1971 (WWF Ordinance). Through these amendments Workers Welfare Fund (WWF) was payable @ 2% of the profit before taxation or taxable income whichever is higher. The legality of the above amendments were challenged in Sindh, Lahore and Peshawar High Courts. Due to variable judgments from the aforesaid Courts, the matter was forwarded to the Honorable Supreme Court of Pakistan. The Honorable Supreme Court has decided the matter on November 10, 2016, and Para 21 of its judgment states that the levy of WWF is in the nature of fee and the law could not be amended by a money bill and as such the amendments made in the year 2006 and 2008 are unlawful and ultravires to the Constitution. In terms of judgment by the Honorable Supreme Court of Pakistan, WWF under WWF Ordinance, is no more payable by the Modaraba and provision made against WWF up till June 30, 2014 is reversed during the period.

Subsequently the Sindh Assembly passed a bill on May 4, 2015 and notified Sindh Worker's Welfare Act 2014 on June 4, 2015. As per the said Act the applicability of the Sindh Workers Welfare Fund is effective from the financial year of the entities ended on or after December 31, 2013. Accordingly, provision has been made at the rate of 2% of profit before taxation or taxable income, whichever is higher, effective after June 30, 2014.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED JUNE 30, 2017

Following are the key assumptions of the actuarial valuation scheme:

-Discount rate	: 7.75% per annum (2016: 7.25 % per annum)
-Expected increase in eligible pay	: 6.75% per annum (2016: 6.25 % per annum)
-Average expected remaining working life time of employees	: 09 years (2016: 09 years)
-Number of employees	: 10 employees (2016: 10 employees)
-Expected mortality rates	: SLIC 2001 - 2005 Setback 1 year (2016: SLIC 2005 Setback 1 year)

Sensitivity analysis of key assumptions

	Impact on obligation of change in assumptions		
	Change in assumption	Increase in obligation	Decrease in obligation
Discount rate	1%	3,120,290	1,628,754
Salary increase rate	1%	3,120,290	1,616,785

22.9 Following risks are associated with unfunded gratuity scheme

Final salary risk (Linked to inflation risk) : The risk that final salary at the time of cessation of service is greater than what Modaraba assumed. Since the benefit is calculated on the final salary (which will closely reflect inflation and other macroeconomics factors), the benefit amount increases as salary increase.

Demographic risks

Mortality Risk : The risk that the actual mortality experience is different than the assumed mortality. This effect is more pronounced in scheme where the age and service distribution is on the higher side.

Withdrawal Risk : The risk of actual withdrawals experience is different from assumed withdrawal probability. The significance of the withdrawal risk varies with the age, service and the entitled benefits of the beneficiary.

Sensitivity analysis for financial instruments

The sensitivity of the net income for the year is the effect of the assumed changes in interest rates on the floating rate financial instruments held at the year end. Since the Modaraba has no floating rate financial instruments held at the year end, therefore it is not exposed to profit risk due to change in market profit rates.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED JUNE 30, 2017

39.4 Price Risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest risk or currency risk) whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Modaraba is exposed to equity securities price risk because of investments held by the Modaraba and classified as 'available for sale' and "At fair value through profit and loss". To manage its price risk arising from investments in equity securities, the Modaraba diversifies its portfolio.

In case of 5% increase / decrease in KSE 100 index on June 30, 2017, other comprehensive income for the year would be affected by Rs.697,532 (2016: Rs 1,578,875) as a result of gains / losses on equity securities classified as 'available and profit and loss for the year would be affected by Rs. 1,512,620/- (2016: 1,147,429) as a result of gains / losses on equity securities classified as 'At fair value through profit and loss.

The analysis is based on the assumption that the equity index had increased / decreased by 5% with all other variables held constant and all the Modaraba's equity instruments moved according to the historical correlation with the index. This represents management's best estimate of a reasonable possible shift in the KSE 100 Index, having regard to the historical volatility of the index. The composition of the Modaraba's investment portfolio and the correlation thereof to the KSE 100 index, is expected to change over time. Accordingly, the sensitivity analysis prepared as of June 30, 2016 is not necessarily indicative of the effect on the Modaraba's net assets of future movements in the level of the KSE 100 Index.

39.5 Credit risk

39.5.1 Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Modaraba is exposed to credit risk in respect of Musharakah, musawamah, modaraba and term deposit modaraba's.

Concentrations of credit risk arise when a number of counterparties are engaged in similar business activities, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of an entity's performance to developments affecting a particular industry.

The Modaraba attempts to control credit risk by diversification of financing activities to avoid undue concentration of credit risk with individuals or groups of customers in specific locations or businesses, monitoring credit exposures, limiting transactions to specific counterparties and continually assessing the credit worthiness of counterparties. It also obtains securities when appropriate.

The Modaraba follows two sets of guidelines. It has its own operating policy and the management of the Modaraba also adheres to the regulations issued by the SECP. The operating policy defines the extent of fund and non-fund based exposures with reference to a particular sector or group.

Out of the total financial assets of Rs. 193,210,165 (2016: Rs 354,643,129) the financial assets which are subject to credit risk amounted to Rs. 88,569,229 (2016: Rs 155,631,297). The management believes that the Modaraba is not exposed to major concentration of credit risk.

39.6 Liquidity risk

Liquidity risk is the risk that the Modaraba will encounter difficulty in meeting its financial obligations as they fall due. Liquidity risk arises because of the possibility that the Modaraba will be required to pay its liabilities earlier than expected or will face difficulty in raising funds to meet commitments associated with financial liabilities as they fall due. The Modaraba's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stress conditions, without incurring unacceptable losses or risking damage to the Modaraba's reputation.

The table below analyses the Modaraba's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

39.7 Fair value of financial assets and liabilities

The carrying value of all financial assets and liabilities reflected in the financial statements approximate their fair values.

Effective July 1, 2009, the Modaraba adopted the amendments to IFRS 7 for financial instruments that are measured in the balance sheet at fair value. This requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2)
- Inputs for the assets or liability that are not based on observable market data (that is, unobservable input) (level 3).

Presently, the modaraba have equity instruments which are disclosed at level 1 of fair value hierarchy.

40 CAPITAL RISK MANAGEMENT

The Modaraba's prime objective when managing capital is to safeguard its ability to continue as a going concern in order to provide adequate returns for certificate-holders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED JUNE 30, 2017

Consistent with others in the industry, the Modaraba monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total Certificate of Musharakah and borrowings less cash and bank balances. Total capital is calculated as equity as shown in the balance sheet plus net debt. The Modaraba has no borrowing at the year end.
