The Economy

Pakistan's economy has shown mixed trends over the recent past. Some economic indicators have continued to improve such as GDP growth which came in at 5.3% for Fiscal Year 2017 (FY17) as compared to 4.7% in the previous year. Inflation rose marginally with consumer price index (CPI) inflation clocking in at 3.9% in September 2017, an increase from 3.41% from the month before. This was one of the main reasons for the State Bank of Pakistan (SBP) to keep the policy rate unchanged at 5.75% in its September 2017 Monetary Policy Statement (MPS). As per the Federal Board of Revenue, tax collection performance was satisfactory with a provisional collection of Pakistan Rupee (PKR) 765 billion for the first quarter (1QFY17), a revenue growth of 20% year-on-year (YoY).

On the other hand, macroeconomic risks and challenges have increased due to a growing fiscal deficit and an imbalanced current account which looks to overwhelm foreign exchange reserves. The current account deficit continued to grow to USD 2.6 billion during the first two months of Fiscal Year 2018 (2MFY18) with import costs at USD 8.98 billion, an increase of over a 100% during the same period last year (FY17). Foreign exchange reserves continue to decline from an amount of USD 21.3 billion at the beginning of July 2017 to USD 20 billion by the end of September 2017. Despite this imbalance, the PKR has remained stable against the USD though talks of PKR devaluation continue to dominate national headlines.

Equity Capital Markets

Contrary to expectations, the PSX has been on a decline since entering the MSCI Emerging Markets index in May 2017. Most put the blame on the uncertainty in the economic and geopolitical environment. In the third quarter of FY 17 (3QFY17), the KSE-100 index was at a low of 41,207 points (August 31, 2017) and recovered marginally to finish the quarter at 42,240 points (September 29, 2017) (+2.5% MoM or 1,033 points). The recovery in September 2017 can primarily be attributed to value buying by foreign investors who bought USD 28 million worth of equities. Local institutional and other investors however mostly remained on the selling side as they continued to face redemption pressures.

Foreign Exchange, Money and Commodities Markets

During the nine months ended September 30, 2017 (9MFY17), USD/PKR parity opened at 1/104.72 as compared to the same period in FY16 when it opened at 1/104.85, reflecting an approximate appreciation of 0.13%. The USD/PKR closed at 1/105.40 as on September 29, 2017 as compared to the same period in FY16, reflecting the minor depreciation of the PKR by an approximate percentage of 0.75. The key event that took place during the 9MFY17 period was the depreciation in the value of PKR to the tune of 3.1% in a single day - down from 1/104.93 to 1/108.28. Intervention from the finance ministry caused it to appreciate back to 1/106, finally settling at an approximate value of 1/105 - the level it has been trading at until recently.

As per SBP's forecast, CPI inflation remained within the 4.0-5.0% range. SBP also conducted the first GOP Ijarah Sukuk auction since March, 2016 with massive participation from the market of PKR 167 billion. The SBP accepted bids of PKR 71 billion at a rate of 5.24%.

Moreover, the average swaps opened in January for 1 Month (1M), 3 Months (3M) and 6 Months (6M) were at 0.31, 0.76 and 1.52 paisas respectively and hit the bottom at 0.14, 0.46 and 0.95 paisas respectively. From April to June 2017,1M, 3M and 6M swap's high were 0.29, 0.68 and 1.26 paisas respectively while the low for swaps was at 0.10, 0.48 and 1.02 paisas respectively. In the third quarter from July to September 2017 for 1M, 3M and 6M swap's high remained at 0.44, 0.89 and 1.69 paisas respectively while low for swaps was at 0.24, 0.60 and 1.24 paisas respectively. On an average, swaps showed a declining trend from the 1QFY17 to 2QFY17 while gaining back a few paisas in 3QFY17.

For the fixed income market, FY17 remained relatively manageable as SBP maintained the discount rate at historic low of 5.75% during the year. Due to uncertainty on the political front, the yield curves showed an upward trend during the 3QFY17 with sharp increases in yields, particularly in the longer tenure bonds. Participation in recent PIBs auctions was insufficient, and that too at the higher yields, with the result that the bids in the auction were rejected. However, the T-Bills auction's cut-off yield for 3M, 6M and 12 months (12M) papers remained almost at the same level. Short-term liquidity remained at comfortable level as well as the SBP kept conducting Open Market Operations (OMOs).

During 9MFY17, the Pakistan Mercantile Exchange (PMEX) increased its product lines by adding natural gas and platinum future contracts, which supported the market's trading volume. Unfortunately, the overall trading volumes maintained a downward trajectory due to uncertainty in the geopolitical situation, implementation of OPEC's agreement to cut oil supply and the US Federal Reserve increasing its federal funds rate from 1% to 1.25%. Overall volumes during 9MFY17 posted a decline of 4.5% whereas overall value traded declined by 13.5% during the same period. A brief look into specific contracts is indicative of an increase in crude oil trading (CRUDE10 volumes were up 12% YoY during 9MFY17), and a decrease in precious metals contracts especially yellow metal (GO10OZ down 25% YoY). Going forward, the situation should improve as other than the tense geopolitical environment, fundamentals remain strong and hint towards improvements in global activity.

Company Performance Review

The Company earned net income of PKR 121.5 million for the nine months ended September 30, 2017 visà-vis net income of PKR 115.4 million in the corresponding period last year, showing an increase of 5.3% over the same period. Operating revenue of the Company increased by 41% over the same period last year on the back of an increase in brokerage income by hefty 45% YoY.

Despite ongoing market-related challenges and the country's political and economic conditions, the Company is focused on maintaining its growth momentum in the long run. Management is acutely monitoring its resources to reap the maximum benefits for its shareholders. This involves optimizing revenue generation from treasury management, core brokerage and fee-based operations whilst at the same time rationalizing our cost base.

ACKNOWLEDGEMENT

We express our sincerest appreciation to our employees for their dedication and hard work and to our clients, business partners and shareholders for their support and confidence.

We would like to acknowledge the Securities and Exchange Commission of Pakistan (SECP), Pakistan Stock Exchange Limited (PSX), Central Depository Company of Pakistan Limited (CDC) and National Clearing Company of Pakistan Limited (NCCPL) for their efforts to strengthen capital markets and measures to protect investor rights.

20. TAXATION

- **20.1** Except for the following matters, there has been no change in tax contingencies as disclosed in annual financial statements for the year ended 31 December 2016.
- 20.2 For tax year 2015, an order dated November 23, 2016 was passed under section 4B of the Ordinance by the Deputy Commissioner Inland Revenue IV [DCIR]. Through said order, an income of Rs. 810,583,651 was computed under section 4B of the Ordinance and resultant demand of super tax of Rs. 24,317,509 was raised. An appeal has been filed against the above order before CIR-A on December 1, 2016 identifying various errors / details not considered by CIR-A and the said appeal has been decided by CIR-A against the Company vide an order dated May 30, 2017. In pursuance of the order of CIR-A, the Company filed an appeal before Appellant Tribunal Inland Revenue (ATIR) and also filed application for stay against recovery of demand. The said stay application was decided in favor of the Company and ATIR granted stay of 60 days on July 18, 2017 and subsequently the said stay was further extended vide various orders by the ATIR. As of now, further extended stay is valid until November 21, 2017.
- 20.3 Tax department has issued show cause notice dated June 08, 2015 confronting (alleged) nonpayment of Federal Excise Duty (FED) on Company's services under Federal Excise Act, 2005 for tax year 2010 to tax year 2013. In response thereto, an extension request was filed. The department however issued order without rejecting the application and raised FED demand of Rs.78.003 million. The said demand comprises of certain errors aggregating to Rs.55.3 million and demand of Rs.22.526 million representing duplicate levy on services for the period from July 2011 to December 2012 on which sales tax has already been paid by the Company under the Sindh Sales Tax on Services Act, 2011. The Company filed a rectification application before Deputy Commissioner Inland Revenue and Appeal before Commissioner Inland Revenue Appeal (CIR-A) amounting to Rs.55.3 million against the said order on account of certain computational errors and the remaining demand of Rs.22.526 million respectively on grounds of duplicate levy as the Company has already paid Sindh sales tax under Sindh Sales Tax on Services Act on such services. The Appeal before CIR-A has been decided against the Company vide order dated January 31, 2017. The Company has filed an Appeal and stay application against the said order in Appellate Tribunal and has been granted stay order for the recovery of demand. The Company has also filed an appeal in the SHC, through Stockbroker Association (of which the Company is also the member) against aforementioned order on the grounds that after 18th amendment to the Constitution, the services that were previously subjected to FED under the federal laws are now subject to the provincial sales tax and the Company has accordingly discharged its tax obligation. The SHC initially, stayed Federal Board of Revenue from demanding sales tax on services from stockbrokers and subsequently, disposed of the order in Company's favor. However, the relevant tax authorities have filed the petition in Honorable Supreme Court of Pakistan which is pending adjudication.

FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the balance sheet date. The estimated fair value of all other financial assets and liabilities is considered not significantly different from book value.

The following table shows financial instruments recognised at fair value, analysed between those whose fair value is based on:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurements using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyse financial instruments measured at the end of the reporting half year by the level in the fair value hierarchy into which the fair value measurement is categorised:
