REVIEW REPORT TO THE MEMBERS

ON THE STATEMENT OF COMPLIANCE WITH THE CODE OF CORPORATE GOVERNANCE

We have reviewed the enclosed Statement of Compliance with the best practices contained in the Code of Corporate Governance (the Code) prepared by the Board of Directors of **Shahzad Textile Mills Limited** for the year ended 30 June, 2017 to comply with the requirements of Listing Regulation No. 5.19.23 of the Rule Book of Pakistan Stock Exchange Limited where the Company is listed.

The responsibility for compliance with the Code is that of the Board of Directors of the Company. Our responsibility is to review, to the extent where such compliance can be objectively verified, whether the Statement of Compliance reflects the status of the Company's compliance with the provisions of the Code and report if it does not and to highlight any non-compliance with the requirements of the Code. A review is limited primarily to inquiries of the Company's personnel and review of various documents prepared by the Company to comply with the Code.

As a part of our audit of the financial statements we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We are not required to consider whether the Board of Directors' statement on internal control covers all risks and controls or to form an opinion on the effectiveness of such internal controls, the Company's corporate governance procedures and risks.

The Code requires the Company to place before the Audit Committee, and upon recommendation of the Audit Committee, place before the Board of Directors for their review and approval of its related party transactions distinguishing between transactions carried out on terms equivalent to those that prevail in arm's length transactions and transactions which are not executed at arm's length price and recording proper justification for using such alternate pricing mechanism. We are only required and have ensured compliance of this requirement to the extent of the approval of the related party transactions by the Board of Directors upon recommendation of the Audit Committee. We have not carried out any procedures to determine whether the related party transactions were undertaken at arm's length price or no.

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflect the Company's compliance, in all material respects, with the best practices contained in the Code as applicable to the Company for the year ended 30 June 2017.

Chairman.

DIRECTORS' REPORT

On behalf of the Board of Directors of Shahzad Textile Mills Limited, it is my great pleasure to present the 39th Annual Report together with the Audited Financial Statements of the Company for the year ended June 30, 2017 and the Auditors' Report thereon which reflects the affairs of the Company.

FINANCIAL AND OPERATIONAL PERFORMANCE

The financial results of the Company are summarized below:

	2017	2016
	Rupees	Rupees
Sales	4,511,169,297	3,692,131,574
Profit/(loss) before taxation and share of associate	27,371,517	(3,701,211)
Share of Net profit of Associate	36,659,452	25,333,606

Taxation	(29,316,329)	(34,989,497)
Profit after Taxation	34,714,640	(13,357,102)

Financial data exhibits that the Company, by the grace of Allah, has earned profit of Rs. 34,715 million after taxation as compared to a loss of Rs.13,357 million in the preceding year. Sales have also increased in the current year to Rs.4,511 billion from Rs. 3,692 billion as recorded in the previous year.

No changes have occurred during the financial year concerning the nature of the business of the company or of its subsidiaries or any other company in which this company has an interest.

GENERAL OVERVIEW

The textile industry in Pakistan faced major challenges during the year under discussion. Yarn prices remained depressed due to low demand in both the export and domestic market although cotton prices were lower as compared to earlier years.

According to experts in the textile industry, Pakistan is sharply losing its export of spun yarn because of the supply of yarn by India, Vietnam and Bangladesh at relatively low prices. Cotton spinning in Vietnam has more than tripled in the last four years due to availability of cheaper energy and lower labor rates. Pakistan's yarn exports have been on the decline for the last couple of years owing to surging costs of production due to a sharp escalation in energy prices. It is difficult for Pakistan to survive in the international market at the current high rates of production. The Government of Pakistan, keeping in mind the seriousness of the situation, offered a 4% export rebate to encourage exporters to boost their exports. The Government should also ensure consistent power supply at cheaper rates to the industry so that the industry may run at par with players in the global market. In Pakistan, the local textile market continued to face troublous times as a result of the uncertain political climate and its affect on the economy. Our cotton crop size has been reduced to approximately 30% in the past few years. The Government, of its own accord, enhances the electricity and gas prices without approximating its negative impact on the industry. It squeezes the profit margin to an unbearable limit. Consequently, many industrialists are forced

to close their units while those who choose to continue operating, do so at the break even points. In spite of all these problems, our Management aims to continue working towards efficiently running the mill and earning profits for their shareholders. Presently, the local market indicated an improvement in yarn rates and exhibited profit margin which shall further boost our sales volume and profit level.

EARNING PER SHARE

The earning per share of the Company for the year ended June 30, 2017 is 1.93 as compared to a loss of Rs.(0.74) in preceding year i.e. 2016.

DIVIDEND AND BONUS ISSUE

The Board of Directors has proposed a 10% cash dividend for the year ended June 30, 2017. The dividend recommended is subject to approval by the shareholders in the Annual General Meeting

FUTURE OUTLOOK

The performance of the textile sector is exclusively reliant on the cotton crop as well as the cost of inputs compared to those in other countries. The cotton crop looks better in the current year but the pressure of other costs including energy, wages and salaries are comparatively higher than the costs in other countries. The textile industry expects improvement during the current financial year as cotton prices are stabilizing and yarn prices have started improving. The Management is determined to show better financial results in the time to come by increasing its export sales and fetching better yarn rates in the local market as well.

In spite of this adverse state of affairs our Management has managed to import 5 Gas Generators and has replaced the existing old ones to improve the process of power generation. The new generators imported from Janbacher Company Austria, have been installed at our mills and are functioning successfully. Two generators, from the existing ones, shall be overhauled for which all necessary parts have been already imported. The overhauling process shall be executed in the currentyear.

ISO 9001-2008 CERTIFICATION

The Company trusts in sustainable quality of yarn to the complete satisfaction of its clients. For this, the Company has obtained the latest version of ISO 9001-2008 Certification which is renewed every year after an extensive checking and complete verification of its quality management system. This quality certification enhances the trust of new customers and boosts the confidence of old clients as well

RELATED PARTY TRANSACTIONS

The transactions between the related parties were made at arm's length prices determined in accordance with the comparable uncontrolled price method. The Company has fully complied with the best practices of transfer pricing as stated in the Listing Regulations. The related party transactions were approved by the Board on the recommendation of Audit Committee.

CHIEF EXECUTIVE

CHIEF FINANCIAL OFFICER

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2017

Note 1

The Company and its Operations

Shahzad Textile Mills Limited (the Company) was incorporated in Pakistan on October 24, 1978 as a Public Limited Company under the Companies Act, 1913 (now the Companies Ordinance, 1984). The shares of the Company are quoted on Pakistan Stock exchange. The registered office of the Company is situated at 19-A, Off Zafar Ali Road, Gulberg - V, Lahore. The Company manufactures and deals in all types of yarn.

Note 2

Basis of Preparation

2.1 Statement of compliance

These financial statements have been prepared in accordance with approved accounting standards as applicable in Pakistan. Approved accounting standards comprise of such International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board as are notified under the Companies Ordinance, 1984, provisions of and directives issued under the Companies Ordinance, 1984. In case requirements differ, the provisions or directives of the Companies Ordinance, 1984 shall prevail.

2.2 Basis of measurement

These financial statements have been prepared under the historical cost convention except to the extent of following:

Staff retirement benefits	Note 8	Present value
Certain property, plant and equipment	Note 14	Revalued amount
Long term investment	Note 15	Equity method
Investments in quoted companies	Note 21	Fair value

2.3 Functional and presentational currency

These financial statements are prepared and presented in Pak Rupees which is the Company's functional and presentation currency. All the figures have been rounded off to the nearest rupee, unless otherwise stated.

2.4 Use of estimates and judgments

The preparation of financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. These estimates and related assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances.

These estimates and related assumptions are reviewed on an on going basis. Accounting estimates are revised in the period in which such revisions are made. Significant management estimates in these financial statements relate to the useful life and residual values of property, plant and equipment, provisions for doubtful receivables, provisions for defined benefit plans, slow moving and obsolete inventory and taxation. However, the management believes that the change in outcome of estimates would not have a material effect on the amounts disclosed in these financial statements.

2.4.1 Property, plant and equipment

The Company reviews the useful lives of property, plant and equipment on a regular basis. Any change in the management's estimates might affect the carrying amount of respective item of property, plant and equipment, with a corresponding effect on the depreciation charge and impairment.

2.4.2 Doubtful receivables

The Company records its trade and other receivables after deducting appropriate provisioning using its prudence and experience. This estimate is subjective in nature. Recoveries of amounts already provided and / or the need of further provisioning cannot be determined with precision.

2.4.3 Staff retirement benefits

The Company has recorded its employees' retirement benefits at fair value using actuarial assumptions regarding increase in salaries in subsequent years, remaining working lives of employees and an estimate of discount rates. Change in actuarial assumptions over the period of time may affect the fair value of post-employment benefits payable and the charge for such liability accounted for in any given period.

Note 2, Basis of Preparation - Contd...

2.4.4 Inventories

The Company has recorded its inventories using lower of cost and net realizable value. Valuation of this inventory is reviewed at regular intervals for determination of possible impairment, if any. Any possible impairment may change the future value of inventories.

2.4.5 Taxation

The Company takes into account the current income tax laws and decisions taken by the appellate authorities. Instances where the Company's view differs from the view taken by the tax department at the assessment stage and the Company considers that its view on items of material nature is in accordance with law, the amounts are shown as contingent liabilities.

2.5 Changes in accounting standards, interpretations and pronouncements

2.5.1 Standards, interpretations and amendments to approved accounting standards which became effective during the year

The following amendments to standards are relevant that became effective during the year. These amendments are not likely to have any impact on the Company's financial statements.

Effective Date

(Period beginning on or after)

IFRS 7 - Financial Instruments: Disclosures [Amendments]January 01, 2016IAS 1 - Presentation of Financial Statements [Amendments]January 01, 2016IAS 16 - Property, Plant and Equipment [Amendments]January 01, 2016IAS 19 - Employee Benefits [Amendments]January 01, 2016

2.5.2 Standards, interpretations and amendments to approved accounting standards which became effective during the year but are not relevant

There were certain amendments to the approved accounting standards which became effective during the year but are considered not to be relevant or have any significant effect on the Company's operations and are, therefore, not disclosed in these financial statements.

2.5.3 Standards, interpretations and amendments to approved accounting standards that are relevant but not yet effective

i) IAS 7 'Cash flow statements: Disclosure initiative' (effective for periods beginning on or after January 1, 2017). This amendment requires disclosure to explain changes in liabilities for which cash flows have been, or will be classified as financing activities in the statement of cash flows. The amendment only covers balance sheet items for which cash flows are classified as financing activities. In case other items are included within the reconciliation, the changes in liabilities arising from financing activities will be identified separately. A reconciliation of the opening to closing balance is not specifically required but instead the information can be provided in other ways. In the first year of adoption, comparative information need not be provided.

ii) IFRS 15, 'Revenue from contracts with customers' (effective for periods beginning on or after January 1, 2018). This standard is yet to be notified by the SECP. This standard deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognized when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 'Revenue' and IAS 11 'Construction contracts' and related interpretations.

Summary of Significant Accounting Policies

The significant accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied, unless otherwise stated.

3.1 Provisions

A provision is recognized in the balance sheet when the Company has a legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation and of which a reliable estimate can be made. However, provisions are reviewed at each balance sheet date and adjusted to reflect current best estimate.

3.2 Staff retirement benefits

Defined benefits plan

The Company operates an unfunded gratuity scheme covering its permanent employees. Employees are eligible for benefits under the gratuity scheme after completion of one year of continuous service. The benefit is calculated based upon the number of completed years of service and last drawn gross salary.

Actuarial gains / (losses) arising from experience adjustments and changes in actuarial assumptions for the defined benefit plan are charged or credited to other comprehensive income in the period in which they arise. Past service costs are charged immediately to income.

3.3 Taxation

Current

Charge for taxation for the year on taxable profit is based on applicable tax rates after taking into account all tax credits and rebates available, if any.

Deferred

Deferred tax is recognised using the balance sheet liability method on all temporary differences between the carrying amount of assets and liabilities and the tax bases. Deferred tax liabilities are generally recognized for all major taxable temporary differences. Deferred tax assets are recognized for all major deductible temporary differences to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilized.

Deferred tax is calculated at the rates that are expected to apply to the period when the differences reverse, based on tax rates that have been enacted or substantially enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

3.4 Trade and other payables

Liabilities for trade and other amounts payable are carried at cost which is the fair value of the consideration to be paid in future for goods and services received, whether or not billed to the Company.

3.5 Contingent liabilities

Contingent liability is disclosed when there is a possible obligation that arises from past events and whose existence is confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

A contingent liability is also disclosed when there is present obligation that arises from past events but it is not probable that an outflow of resources embodying economic benefits would be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

3.6 Property, plant and equipment

Owned

Property, plant and equipment are stated at cost / revalued amount less accumulated depreciation and identified impairment loss, if any, except freehold land which is stated at revalued amount.

The management reviews market value of revalued assets at each balance sheet date to ascertain whether the fair value of revalued assets has differed materially from the carrying value of revalued assets, thus necessitating further revaluation.

Depreciation on property, plant and equipment has been provided for using the reducing balance method at the rates specified in Note 14 and is charged to the profit and loss account. Depreciation on additions is charged from the month in which the asset is available for use up to the month in which the asset is disposed off.

Maintenance and normal repairs are charged to income as and when incurred. Major renewals and improvements are capitalized. Gain or loss on disposal of property, plant and equipment, if any, is shown in the profit and loss account.

Leased

Leases where the Company has substantially all the risks and rewards of ownership are classified as 'finance lease'. Assets subject to finance lease are initially recognized at the lower of present value of minimum lease payments under the lease agreements and the fair value of the assets. Subsequently these assets are stated at cost less accumulated depreciation and identified impairment loss.

Related rental obligations, net of finance charges are included in liabilities against assets subject to finance lease. Liabilities are classified as current and long term depending upon the timing of payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate of return on the balance outstanding. The interest element of the rental is charged to profit over the lease term.

Assets acquired under a finance lease are depreciated over the useful life of the asset using the reducing balance method at the same rates as used for owned assets. Depreciation of leased assets is charged to the profit and loss account. Depreciation on additions to leased assets is charged from the month in which an asset is acquired while no depreciation is charged for the month in which the asset is disposed off.

Capital work-in-progress

Capital work-in-progress is stated at cost less any identified impairment loss.

3.7 Impairment

Carrying amount of the Company's assets are reviewed at each balance sheet date to determine whether there is any indication of impairment loss. If any such indication exists, recoverable amount is estimated in order to determine the extent of the impairment loss, if any.

The recoverable amount is the higher of the fair value less costs to sell and value in use. In the absence of any information about the fair value of a cash-generating unit, the recoverable amount is deemed to be the value in use.

Impairment loss is recognized as expense in the profit and loss account. Where conditions giving rise to impairment are being reversed subsequently, the effect of the impairment charge is also reversed as a credit to the profit and loss account. Reversal of impairment loss is restricted to the original cost of asset.

3.8 Investment in associate

An associate is an entity in which the Company holds more than 20% voting power or over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The operating results, assets and liabilities of associates are incorporated in the financial statements using the equity method. This method is applied from the date when significant influence is established until the date when the significant influence ceases. The Company's share of income and expenses of associates are recognized based upon their latest audited financial statements after realigning their accounting policies, if required.

The share of losses of the associate are recognised to the extent of carrying value/cost of investment. Further losses are recognized only when the Company has made payments on behalf of the associate or has an obligation to make payments on its behalf.

Unrealized gains and losses, if any, arising from transactions with associates are eliminated under the equity method. The Company's share of changes recognized directly in associate's statement of comprehensive income and statement of changes in equity are recognized directly in the Company's statement of comprehensive income and statement of changes in equity, respectively.

Investments in associates, not accounted for under the equity method are classified as "Available for Sale".

3.9 Stores, spares and stock in trade

These are valued at lower of cost and net realizable value; cost being determined as under:

Stores and spares - At moving average cost

Raw materials - At average cost

Material in transit - At cost comprising invoice value plus incidental charges

Work in process - At estimated average manufacturing cost

Finished goods - At average manufacturing cost

Wastes - At net realizable value

Manufacturing cost in relation to work-in-process and finished goods comprises cost of material, labor and appropriate manufacturing overheads.

Net realizable value signifies the selling price at which goods in stock could be currently sold less any further costs which would be incurred to complete the sale.

3.10 Trade debts and other receivables

All outstanding receivables are reviewed at the balance sheet date. The Company recognizes and carries these receivables at original invoice amount less an allowance for uncollectible amounts, if any. Bad debts are written off as incurred and provision is made against debts considered doubtful when the collection of full amount is no longer probable.

3.11 Cash and cash equivalents

Cash and cash equivalents for the purpose of cash flow statement comprise cash in hand, cash at bank and short term highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

3.12 Financial instruments

3.12.1 Financial assets

The classification depends on the intended purpose for which the financial assets were acquired. The management determines the classification of its financial assets at the time of initial recognition. The Company classifies its financial assets in the following categories:

At fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading and financial assets designated upon initial recognition as at fair value through profit or loss. A financial asset is classified as held for trading if acquired principally for the purpose of selling in the short term. Assets in this category are classified as current assets.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These are included in current assets, except for maturities greater than twelve months after the balance sheet date, which are classified as non-current assets. Loans and receivables comprise advances, deposits and other receivables in the balance sheet.

Held to maturity

Held to maturity are financial assets with fixed or determinable payments and fixed maturity, where the management has the intention and ability to hold till maturity, are carried at amortized cost.

Available-for-sale

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. These are included in non-current assets unless the management intends to dispose off the investments within twelve months from the balance sheet date, in which case these financial assets are classified as short term investments in the balance sheet.

When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments recognised directly in equity are included in the profit and loss account as gains and losses from investment securities. Interest on available-for-sale securities calculated using the effective interest method is recognised in the profit and loss account. Dividends on available-for sale equity instruments are recognised in the profit and loss account when the Company's right to receive payments is established.

Measurement criteria

All financial assets are recognised at the time when the Company becomes a party to the contractual provisions of the instrument. Regular purchases and sales of investments are recognised at trade date that is the date on which the Company commits to purchase or sell the asset.

Financial assets are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in the profit and loss account.

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. 'Loans and receivables' and 'held to maturity' investments are carried at amortized cost using effective interest rate method.

Fair values of quoted investments are based on current prices as prevailing on stock exchange. If the market for a financial asset is not active (for unlisted securities), the Company measures the investments at cost less impairment in value, if any.

Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

The Company assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired.

3.12.2 Financial liabilities

All financial liabilities are recognised at the time when the Company becomes a party to the contractual provisions of the instrument.

Financial liabilities, other than those at fair value through profit or loss, are measured at amortized cost using the effective yield method.

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange and modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in respective carrying amounts is recognised in the profit and loss account.

3.12.3 Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities and tax assets and tax liabilities are set off in the balance sheet, only when the Company has a legally enforceable right to set off the recognized amounts and intends either to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

3.13 Foreign currency translation

Assets and liabilities in foreign currency are stated in Pak Rupees at the rates of exchange ruling on the balance sheet date or rate of exchange fixed under contractual agreements. Transactions in foreign currency are translated at the exchange rate prevailing at the date of transaction. All exchange differences are included in the profit and loss account.

3.14 Related party transactions

Transactions with related parties are based on the transfer pricing policy that all transactions between the Company and the related party or between two or more segments of the Company are at arm's length prices using the comparable uncontrolled price method except in circumstances where it is not in the interest of the Company to do so.

3.15 Revenue recognition

- Revenue from sale of goods is recognised at the time of dispatch of goods to customers.
- Dividend on equity investments is recognized as income when the Company's right to receive the dividend is established.

3.16 Borrowing costs

Borrowing costs are charged to income as and when incurred except those costs that are directly attributable to acquisition, construction or production of qualifying assets that are capitalized as part of the cost of assets.

3.17 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (the Chief Executive Officer). Segment results, assets, and liabilities include items directly attributable to a segment. Segment capital expenditure is the total cost incurred during the year to acquire property, plant and equipment.

3.18 Dividends

Dividends are recognized as a liability in the period in which these are declared.

Financial Risk Management

38.1 Financial risk factors

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, price risk and interest rate risk), credit risk and liquidity risk. The Company's overall risk management policies focus on the unpredictability of financial markets and seek to minimize potential adverse effects on the financial performance.

Risk management is carried out by the Board of Directors (the Board). The Board provides principles for overall risk management, as well as policies covering specific areas such as currency risk, price risk, interest rate risk, credit risk and liquidity risk.

(a) Market risk

(i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk arises mainly from future commercial transactions or receivables and payables that exist due to transactions in foreign currencies.

The Company is exposed to currency risk arising with respect to the United States Dollar (USD). Currently, the Company's foreign exchange risk exposure is restricted to the amounts receivable from / payable to foreign entities. As at the balance sheet date, the Company's exposure to currency risk was as follows:

	2017	2016
	Rupees in	thousand
Trade debts	34,249	12,138
Outstanding commitments against letters of credit	(6,095)	(33,890)
Net exposure	28,154	(21,752)
The following significant exchange rates were applied during the year:		

Rupees per US Dollar

Average rate during the year reported	103.68	100.23
Reporting date rate	104.80	102.55

Sensitivity analysis

If the functional currency, at reporting date, had weakened / strengthened by 1% against the USD with all other variables held constant, the impact on profit before taxation for the year would have been Rs. 0.2815 million (2016: Rs. 0.2175 million) respectively lower / higher, mainly as a result of exchange gains / losses on translation of foreign exchange denominated financial instruments. This sensitivity analysis reflects exposure as at reporting date and is unrepresentative of the exposure during the year.

(ii) Price risk

Price risk represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer or factors affecting all similar financial instrument traded in the market. The Company is exposed to equity and commodity price risk in respect of short term investments carried at market value. Following analysis shows the impact of change in equity and commodity price.

	2017 Equity	2016 Equity
	Ru	pees
5 (%)	1%	1%
profit and loss account (Rs.)	8,205	11,838

Note 38, Financial Risk Management - Contd...

(iii) Interest rate risk

This represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company has no significant long-term interest-bearing asset. The Company's interest rate risk arises from short term borrowings. As the borrowings made at variable rates, these expose the Company to cash flow interest rate risk. As at the balance sheet date the interest rate profile of the Company's interest bearing financial instruments was as follows:

	2017	2016
Fixed rate instruments	Rupees in thousand	
Long term financing	139,517	-
Floating rate instruments		
Financial liabilities		
Short term borrowings	406,847	320,591

Cash flow sensitivity analysis for variable rate instruments

The following analysis demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Company's profit and loss account. This analysis is prepared assuming the amounts of floating rate instruments outstanding at balance sheet dates were outstanding for the whole year.

	2017	2016
	Rs. In t	housand
Change in interest rates (%)	1%	1%
Effect on profit and loss account (Rs.)		
Short term borrowings	4,068	3,206
Total effect on profit and loss account	4,068	3,206

(b) Credit risk

Credit risk represents the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Carrying amounts of financial assets represent the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows: 2017

	2017	2010
	Rupees in thousand	
Long term deposits	13,970	13,970
Trade debts	92,684	45,988
Short term investments	821	1,184
Trade deposits and other receivables	20,759	28,582
Bank balances	59,708	87,258

Company exposure relating to credit risk relating to trade debt is disclosed in relevant notes to the financial statement. There are no significant debtors that are past due as at the balance sheet date.

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rate:

(c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company manages its liquidity risk by maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities. As at the balance sheet date, the Company had Rs. 2,062 million (2016: 2,255 million) worth unavailed short term borrowing limits available (both funded and unfunded) from financial institutions and Rs. 60.40 million (2016: Rs. 88.15 million) cash and bank balances. Following are the contractual maturities of financial liabilities, including interest payments.

Contractual maturities of financial liabilities as at June 30, 2017:

	Carrying Amount	Contractual cash flows	Within 1 year	2-5 Years	More than 5 years
		R	upees in thous	and

The contractual cash flows relating to the above financial liabilities have been determined on the basis of interest rates / mark up rates effective as at June 30,2017. The rates of interest / mark up have been disclosed in relevant notes to these financial statements.

(d) Fair value of financial instruments

Fair value is an amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction. Consequently, differences may arise between the carrying value and the fair value estimates.

As at June 30, 2017 the net fair value of all financial assets and financial liabilities are estimated to approximate their carrying values.

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the balance sheet date. The fair values of all other financial assets and liabilities are not considered to be significantly different from their carrying values.

The Company classifies the financial instruments measured in the balance sheet at fair value in accordance with the following fair value measurement hierarchy:

Level	1 ((Juote	d marl	ket p	rices
-------	-----	--------	--------	-------	-------

Level 2 Valuation techniques (market observable)
Level 3 Valuation techniques (non market observable)

38.3 Fair values of financial assets and liabilities

Carrying values of all financial assets and liabilities reflected in these financial statements approximate to their fair values. Fair value is determined on the basis of objective evidence at each reporting date.

Note 39

Capital Risk Management

While managing capital, the objectives of the Company are to ensure that it continues to meet the going concern assumption, enhances shareholders' wealth and meets stakeholders' expectations. The Company ensures its sustainable growth viz. maintaining optimal capital structure, keeping its finance cost low, exercising the option of issuing right shares or repurchasing shares, if possible, selling surplus property, plant and equipment without affecting the optimal production and operating level and regulating its dividend payout thus maintaining smooth capital management.

In line with others in the industry, the Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings less cash and cash equivalents. Total capital is calculated as equity as shown in the balance sheet plus net debt.

Note 39, Capital Risk Management - Contd...

As at the balance sheet date, the gearing ratio of the Company was as under:

2017 2016 Note Rupees in thousand Total borrowings 7 & 11 546,363 320,591 Cash and bank balances (60,340)(88,151)**Net Debt** 486,023 232,440 **Equity** 1,268,501 1,209,039 **Total capital employed** 1,754,524 1,441,479 **Gearing Ratio** 27.70% 16.13%

سمینی کے مالیاتی نتائج کاخلاصہ حسب ذیل ہے:

	2017(روپي)	2016(روپي)
دھا گے کی فروخت	4,511,169,297	3,692,131,574
ٹیکس سے پہلے منافع/(نقصان)اورایسوی ایٹ کا حصہ	27,371,517	(3,701,211)
ایسوی ایٹ کے خالص منافع کا حصہ	36,659,452	25,333,606
ٹیکس سے پہلے منافع	64,030,969	21,632,395
<i>فيكسي</i> شن	(29,316,329)	(34,989,497)
ٹیکس کے بعد منافع	34,714,640	(13,357,102)

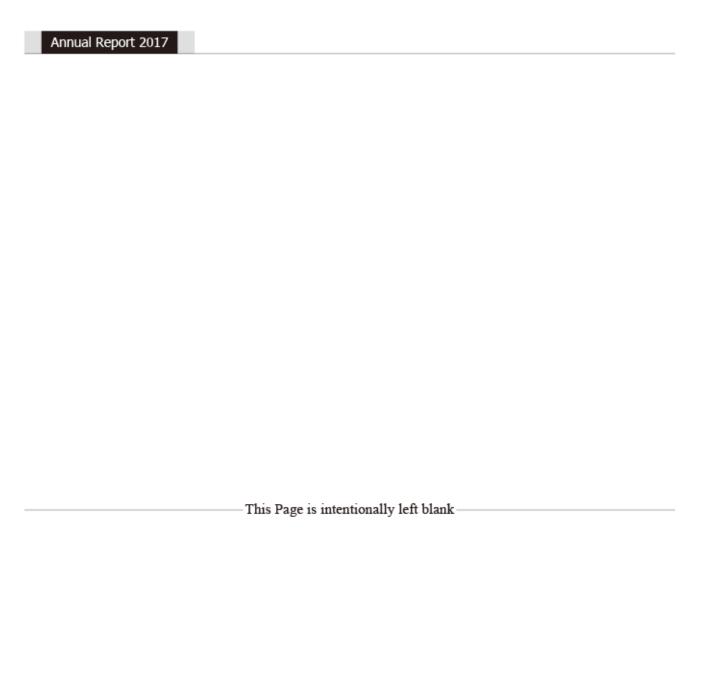

مالیاتی اعداد وشار سے واضح ہے کہ کمپنی نے اللہ کے فضل ہے قبل از ٹیکس منافع 34,715 ملین روپے کمایا ہے جبکہ گزشتہ سال میں کمپنی کا نقصان 13,357 ملین روپے تھا۔ کمپنی کی دھاگے کی فروخت میں بھی گزشتہ اس مدت کی 3,692 بلین روپے فروخت کے مقابلے میں 4,511 بلین روپے نمایاں اضافہ واقع ہوا ہے۔

زیر جائزہ سال کے دوران پاکتانی ٹیکٹائل سیکٹرامشکلات سے دوجا رہا ہے۔ یارن کی قیمتیں برآ مداور مقامی مارکیٹ دونوں میں کم طلب کے باعث کم رہیں اگر چہ کیاس کی قیمتیں گذشتہ سالوں کے مقابلے کم تھیں۔ ٹیکٹائل ماہرین کے مطابق بھارت، ویتنام اور بنگلہ دیش سے نسبتا کم قیمتوں پر یارن کی فراہمی کی وجہ سے یارن کی برآ مدات پاکتان میں تیزی سے گررہی ہیں۔ ویتنام میں کاٹن سپنٹگ سستی بنگل اور کم اجرت مزدوروں کی دستیانی کے باعث گذشتہ چارسالوں سے تین گنازیادہ ہے۔ پاکتانی یارن پیداوار بکل کی قیمتوں میں بہت زیادہ اضافہ کی وجہ سے بردھتی ہوئی پیداوار کی لاگئت کی مدمیں گذشتہ کئی سالوں سے کم ہورہی ہے۔ پیداوار کی اعلی شرحوں پر بین الاقوامی مارکیٹ میں موجودگی پاکستان کے لئے مشکل ہے۔ حکومت پاکستان نے حالات کی نزاکت کو تیجھتے ہوئے ، اپنی برآ مدات کوفروغ دینے کے لئے برآ مدکندگان کی حوصلہ فزائی کے لئے 40 مرآ مدی رعایت کی چیکش کی ہے۔ حکومت کو صنعت کے لئے ستے ریٹس پرمسلس بکل کی سپلائی کو بھی بیتنی بنانا چاہئے تا کہ صنعت عالمی مسابقتی سطح کے مساوی درجہ پر چال سکے۔

پاکستان میں مقامی ٹیکسٹائل مارکیٹ معیشت پر چھائے غیر بیٹنی سیاسی حالات کے سیاہ بادلوں کے باعث مشکل ادوار کا سامنا کر رہی ہے۔ گزشتہ سالوں میں ہماری کہاس کی فصل کا سائز تقریباً 30 فیصد کم ہوگیا ہے۔ حکومت صنعت پراس کے منفی اثرات کا تخمینہ لگائے بغیر غیر مخصر طور پر بھی اور گیس کی قیمتوں میں اضافہ کردیتی ہے۔ بینا قابل برداشت حد تک منافع مارجن کو کم کردیتا ہے۔ اس کے نتیج میں، بہت سے صنعت کا راپنے یوٹنس کو بند کرنے پر مجبور ہوگئے ہیں اور دوسری صورت میں بغیر نقصان پر چلانے کے لئے مجبور ہیں۔ ان تمام رکاوٹوں کے باوجود ہماری انتظامیا پی تمام ذہانت اور اوروسی صنعتی تجربے کے ساتھ کل کومؤثر اندازے چلایا اور اپنے تصص داروں کے لئے منافع کمایا ہے۔ فی الحال ، مقامی مارکیٹ نے یاران کی شرحوں میں بہتری اور منافع بخش مارجن فل ہر کیا ہے جس ہے ہمارے بیلز جم اور منافع کی سطح کومز پر فروغ سلے گا۔
